Multi-purpose FenderFlex™

Bow - Stern – Dock – Topside

Quick to attach as a bow fender with only two lines and optional double hooks.

Provides real protection from a swinging anchor.

Brilliant for use on topsides in canals and locks.

Easy mounting on various pontoons.

FenderFlex TM EU Community Design 002067363 additional IPR applications pending worldwide

Correct inflation

FenderFlex™ is already inflated at purchase and only requires this low pressure for correct operation.

If additional air becomes required, do not over-inflate and ensure that the hinge remains free to move.

For easiest inflation carefully use a compressor or the DAN-FENDER hand pump. More info at www.danfender.com
